

1 Optical Eight-Electric Gigabit Switch

Overview

BL166G is an industrial Ethernet switch with 8 Gigabit ports (10/100/1000 Mbps) and 1 Gigabit fiber port (1000Base-X). It meets FCC, CE, and RoHS standards. Designed for harsh environments, it operates from -40°C to +75°C, featuring an IP40-rated enclosure, LED indicators, and DIN rail mounting. Use high-quality photoelectric integrated modules to provide good optical and electrical characteristics. Ensure reliable data transmission and long working life. Support full-duplex or half-duplex mode with auto-negotiation capability. The network port supports automatic cross-recognition. Built-in HiOSO FC830AG-8G is a 100/1000 adaptive Ethernet fiber converter (also known as photoelectric media converter), providing eight 100/1000M adaptive gigabit electrical ports and one gigabit optical port. Two types of media. Various port combinations, rate increase, installation in a concealed telecommunication box, recommended for indoor use, aesthetically pleasing design, and security. The Ethernet architecture and novel Fiber-to-the-Room (FTTR) deployment delivers 10G fiber-to-the-room access.
