

7000 Switch Core

Overview

The modular Cisco Nexus 7000 and 7700 switches deliver a comprehensive Cisco NX-OS feature set and open-source programmable tools for software-defined networking (SDN) deployments. Create the network foundation for a next-generation Unified Fabric data center. They are a modular data center-class product line designed for highly scalable 1/10/40/100 Gigabit Ethernet networks. The S7700 series provide service optimization features like wired and wireless convergence, unified user management, quality awareness (iPCA), H-QoS, and unified security. They provide 100 GE ports, support SVF 2.0, and have superb scalability and reliability. 7x0 Series, Virtual Edge Overview Integrated 5G Enterprise-class SD-WAN appliances for branches, embracing cloud, generative AI and application transformation. Ideal for data centers and enterprise core.
