

Alloy plastic cable trays are in stock

Article Overview

Alloy plastic cable trays are currently in stock and available from multiple suppliers, offering durable, fireproof, and corrosion-resistant solutions for cable management.

Product Overview

Alloy plastic cable trays combine polymeric materials with metal alloys, typically aluminum or steel inserts, to provide strength, light weight, and corrosion resistance. These trays are designed to support electrical, fiber optic, and data cables while maintaining structural stability and easy installation in commercial or industrial settings . The plastic coating prevents corrosion, while the alloy core ensures rigidity and durability .

Key Features

- **Durable and fireproof:** Suitable for environments requiring safety and long-term reliability .
- **Corrosion-resistant:** Ideal for areas prone to moisture or chemical exposure .
- **Lightweight:** Easier handling and installation compared to full-metal trays .
- **Customizable:** Available in various sizes, styles, and configurations to meet specific project requirements .
- **Standards-compliant:** Many trays meet international standards for cable management, including DIN EN 61537 .
