

Asian EPS Power Distribution Box

Overview

Connects to on-grid inverters (24A), off-grid inverters (24A), utility grid (63A input/25A output), and loads (63A). It contains three 25A components and works at altitudes up to 3000m. PROJOY DC & AC Electric Boxes are used for residential, C&I scenario PV plants for combining DC strings, electricity distribution, protecting DC&AC components, Like PV modules/Solar inverter/Battery/DC&AC cable and convenient system maintenance purpose. Reasonable distribution of electrical energy. The SolaX X1 and X3 EPS Boxes are designed for easy integration with single-phase and three-phase inverters. Their compact build and integrated dual contactors simplify wiring and support flexible installation in any setup. Suitable for environments with 4-100% humidity, it meets diverse power distribution needs. The X3-EPS BOX G2. A distribution board (also known as panelboard, breaker panel, electric panel, DB board or DB box) is a component of an electricity supply system that divides an electrical power feed into subsidiary circuits while providing a protective fuse or circuit breaker for each circuit in a common. The EPS Modular Metal clad Enclosures 14E-Series Standard Series is a modular distribution board system with a durable matt surface finish for long-lasting protection.
