

Common Specifications of XXM Type Distribution Boxes

Overview

XXM low-voltage lighting distribution box is suitable for single-phase and three-phase circuits with frequency of 50Hz, rated voltage below 400V, and load current not more than 100A. This series of products is a terminal combination electrical distribution box with leakage, overload and short-circuit protection functions. It is suitable for lighting and power distribution in various residential buildings, high-rise buildings, hotel buildings, shopping malls, hospitals. The XXM series lighting and power control distribution boxes are available in three variants: universal type, outdoor type, and transparent window type. They can be designed for either surface-mounted wall installation or concealed recessed installation based on user requirements. As lighting and. XM Cabinet is widely used in lighting distribution systems of power station, transformer station, factory, mine, hotels, apartment, buildings, port, railway station, airport, warehouse, hotels etc.
