

Comoros ST pigtail fiber

Article Overview

ST/UPC fiber optic pigtails are available in Comoros, including 12-strand, 1.5-meter singlemode and multimode options.

Product Overview

An ST/UPC fiber optic pigtail is a short length of optical fiber with a pre-terminated ST/UPC connector on one end and an exposed fiber on the other for splicing into a network. These pigtails are used to connect trunk cables to equipment like patch panels or transceivers, providing a low-loss, high-performance connection. The ST connector features a bayonet-style coupling mechanism and a 2.5mm ferrule, making it reliable for field installations.

Specifications Available in Comoros

- Fiber Type: Singlemode (9/125 μ m) and Multimode (OM1 62.5/125 μ m)
- Strand Count: Commonly 12 strands, also available in 1 or 6 strands
- Length: 1.5 meters (other lengths may be available)
- Connector: ST/UPC
- Cable Diameter: Standard 0.9mm
- Color Coding: Each fiber strand is color-coded for easy identification during splicing
- Applications: Suitable for network communication systems, data centers, and telecom installations
