

Cost of directly burying one kilometer of optical fiber cable

Article Overview

The cost of directly burying one kilometer of optical fiber cable typically ranges from \$40,000 to \$350,000, depending on terrain, trenching method, and project complexity.

Cost Breakdown

Direct burial of fiber optic cable involves several cost components:

- **Cable Material:** Armored, gel-filled, water-blocked fiber designed for direct burial costs approximately \$6–\$14 per linear foot (\$19.68–\$45.92 per meter) depending on fiber type and strand count .
- **Trenching and Labor:** Excavation labor ranges from \$7–\$50 per linear foot, influenced by soil conditions, depth, and terrain. Rocky or high-water-table areas can double these costs .
- **Conduit (Optional):** While direct burial can be done without conduit, adding HDPE or PVC conduit costs \$2–\$4 per foot and allows future cable upgrades .
- **Permits and Right-of-Way:** Urban areas may require traffic control, flaggers, and restoration, adding \$1–\$10 per foot .
- **Splicing and Termination:** Costs for splice closures and termination points vary, typically \$200–\$800 per access point .
