

Does Huijue have a distribution box

Article Overview

Yes, Huijue offers a range of distribution boxes, including low-voltage electrical, outdoor enclosure, and fiber optic distribution boxes.

Huijue manufactures HJ-501 Low Voltage Electrical Distribution Boxes, designed for safe and reliable power management in residential, commercial, and industrial environments. These boxes are made from high-quality stainless steel or cold-rolled steel, offering corrosion resistance, customizable sizes, and voltage ratings from 12V to 240V with current capacities up to 100A. They provide overload and short-circuit protection, easy installation, and comply with CCC, CE, and ISO9001 standards. For telecom and outdoor applications, Huijue produces weatherproof outdoor enclosure cabinets that integrate power distribution, backup power, and monitoring systems. These cabinets are suitable for base stations, data centers, and industrial sites, offering IP54 to IP65 protection, thermal management, and flexible mounting options (pole, wall, or floor) to ensure reliable operation in harsh environments. In the fiber optic domain, Huijue provides optical distribution boxes and ODN equipment, including jumperless optical cross-connect cabinets, termination boxes, and fiber distribution boxes ranging from 8-core to 48-core configurations. These products support optical fiber access networks and can be customized for specific project requirements. Overall, if your project or system requires a Huijue distribution box, you can select from electrical, outdoor enclosure, or fiber optic variants depending on your application, ensuring compatibility with power, communication, or network infrastructure needs.
