

Electrical cable tray bushing accessories

Overview

Common cable-management accessories include tray covers (when protection is needed), dividers (power/signal separation), cable clamps/cleats (retention and spacing), drop-out plates (controlled exits), and edge guards/bushings (to protect cable jackets at transitions). Cable trays are components used in the wiring of buildings to support insulated cables and organise them to be hidden from view. They offer an alternative to open wiring or electrical conduit systems and are necessary for cable management in commercial and industrial construction, as well as. In addition to the covers, optional accessories in various materials and coatings are available to supplement the cable support system, e. gutter connectors, connecting plates, separating strips and protective rings. At ChannelandTray, we offer a comprehensive range of cable tray accessories designed to enhance the functionality and durability of cable. Products within the cable and wire management category are used for physically organizing, protecting, installing, or identifying electrical or fiber optic conductors and cables.
