

FC fiber optic cold splice manufacturer

Overview

At Fenxi Optoelectronics Technology, we specialize in delivering high-performance optical communication solutions. Our Fiber Optic Splice Tray FC/APC-12core is engineered to provide superior protection and organization for fiber fusion splicing. The FC connector from DIAMOND SA is a robust and precision-engineered optical interface designed for. To resolve this problem, the UCL Swift fiber optic splice-on connectors, such as the FC Splice-On Connector, uses the ferrule to disperse this transformation and prevent fiber optic disconnect. Alternatively, our Vytran[®] fiber recoaters offer flexible, low-profile splice protection. It uses a hot melt machine to fuse prefabricated connector ferrule with optical cables, integrating high stability, low loss, and. Fast Connector make fiber terminations quick, easy and reliable. These fiber optic connectors offer terminations without any hassles and require no epoxy, no polishing, no splicing, no heating and can achieve similar excellent transmission parameters as standard polishing and splicing technology. The FC is a keyed connector with a 2.
