

Fiber Optic Cable Maintenance Section

Overview

Monthly Maintenance: Randomly inspect fiber optic cable connections, test backbone fiber optic link attenuation, and clean connector end faces. Some people have suggested that fiber optic networks need periodic maintenance, including microscopic inspection of connectors and mating adapters and even insertion loss testing or taking OTDR traces. It could hurt an installer or get them sued by an irate network owner. Recommendation ITU-T L. This revision is intended to be appropriate for the current situation with respect to. Small oil micro-deposits and dust particles on fiber optic cable optical surfaces may cause a loss of light or degraded signal power which may ultimately cause intermittent problems in the optical connection. Digital tools, such as IQGeo's Fiber Network Management System, now offer smarter Fiber Optic Solutions for tracking, organizing, and maintaining networking infrastructure.
