

Fiber optic router port IPTV

Overview

Select Ethernet port 2 in the Port List area, that is, the network port used to access the IPTV. This article will introduce the configuration of the IPTV function and guide you in configuring it on TP-Link Wi-Fi router correctly. Log in to the TP-Link device by typing net in the address bar of any web browser (such as Chrome or Firefox). Navigate to Advanced. Ports 1 and 2 are dedicated for Internet (VLAN 558, confirmed from their end) and ports 3 and 4 are dedicated for IPTV (VLAN 658). My current setup is: All devices have internet connectivity (1Gbps, rock solid). 3) Port 4 on my ISP router connects to Port 4 on my router; 4) Port 3 on my switch. The optical gateway uses the LAN upstream mode. 1 and. At present, IPTV has two transmission modes: 1. Note: The router does not supports the enable multicast routing (IGMP Proxy). [Disable/Microsoft/RFC3442/RFC3442 &Microsoft] Step6.
