

How much does German cable tray processing cost

Article Overview

The cost of cable tray processing in Germany varies widely, typically ranging from €20 to over €200 per meter depending on material, type, and project complexity.

Material Costs

Cable tray prices depend heavily on the material used:

- Pre-Galvanized Steel (PG): Most affordable, suitable for dry indoor environments like offices or schools .
- Hot-Dip Galvanized Steel (HDG): More expensive due to thicker zinc coating, ideal for outdoor or industrial settings .
- Aluminum: Lightweight and moderately expensive, reduces the need for heavy hangers .
- Stainless Steel: Highest cost, used in hygienic or corrosive environments such as food plants or coastal installations . Standard ladder-type trays of 2.4 meters typically start around €50–€100 per tray for hot-dip galvanized steel, with fittings (bends, tees, reducers) priced per unit . Wire mesh or basket trays are generally cheaper and easier to install, often used for data cables in offices or data centers .

Labor and Processing Costs

Processing and installation costs are a significant portion of the total expense:

- Open cable trays are faster to install than conduit systems, reducing labor costs .
