

How much does an indoor electrical distribution box typically cost

Article Overview

Indoor electrical distribution boxes typically cost between \$10 and \$700 for the unit alone, with total installed costs ranging from \$40 to over \$1,500 depending on size, material, and complexity.

Basic Junction Boxes

For simple indoor wiring projects, plastic junction boxes are the most affordable, usually priced between \$10 and \$60. They are lightweight, easy to install, and suitable for standard residential wiring, but less durable than metal options. Metal boxes offer greater strength and impact resistance, commonly used in workshops or garages, and typically cost more, ranging from \$20 to \$150 depending on size and features .

Standard Panel Boxes

A standard residential panel box (100-125 amp service) generally costs \$150 to \$700 for the unit alone. Installation, including wiring and breakers, can bring the total to \$450-\$1,500. Factors influencing cost include amperage rating, number of breaker spaces, enclosure material, and labor complexity . Upgrades to higher amperage (200 amp) or premium enclosures can exceed \$2,000-\$3,500 installed .
