

How much is the power distribution box for a low-voltage electrical room A

Article Overview

The price of a low-voltage power distribution box can range from a few hundred to several thousand dollars, depending on size, features, and installation requirements.

Price Range

For a basic low-voltage distribution box suitable for a small electrical room, prices typically start around \$200 to \$500 for simple enclosures with minimal internal components, such as incoming protection and branch breakers. More advanced or industrial-grade cabinets, which include features like branch circuit monitoring, smart interfaces, communication modules, and higher-quality breakers, can cost \$1,000 to \$5,000 or more. The final price depends heavily on:

- Rated current and load capacity
- Number of outgoing circuits
- Breaker brand and quality
- Cabinet material (ABS plastic, powder-coated steel, or stainless steel)
- Monitoring and smart features
- IP rating and ventilation
- Customization requirements for specific project needs
