- Drill a hole of 1 3/8 inches (35 mm) for most stainless steel air switch buttons ().
 - For some models, a 1 1/2-inch hole may be required if using a larger button or top-mount sink deck ().
 - Ensure the edges are smooth to prevent damage to the O-ring or tubing.
3. Insert the Air Switch Button
- Loosen the switch base to expose the threads.
 - Insert the button through the drilled hole.
 - Slide the washer up and thread the clamp nut onto the threaded shroud underneath the box or countertop.
 - Hand-tighten the nut until snug; no plumber's putty is required as the O-ring seals the base ().
