

IPM type distribution box

Overview

Prisma iPM is a fully tested, IEC 61439-1 and 2-compliant switchboard system designed to deliver safe, reliable, and scalable low-voltage distribution for commercial and industrial buildings. Our flexible distribution boxes enable reliable, decentralised signal transmission and power transmission up to protection class IP67 – wherever passive distribution boxes are required. From power and signal distribution to I&C applications and complete room. IPM (Intelligent Power Module) is a high-performance module that mounts a dedicated drive circuit for drawing greater performance from an IGBT chip, and it provides a custom IC for executing self-protection functions (short circuit, supply under voltage, and over temperature). They support various connectivity options, enhancing system efficiency and productivity with secure data. For seamless consolidation, distribution, and management of power supply. Find distribution boxes that are designed to perform and last longer.
