

Is a 450G router suitable for a 200Mbps fiber optic connection

Overview

Yes, you can often use your existing router with fiber optic internet, but there are crucial considerations. Understanding compatibility, potential limitations, and when an upgrade is necessary will ensure you get the most out of your high-speed connection. This guide will break down everything you. Upgrading to a Wi-Fi 6 or 6E router helps you get the full benefit of symmetrical fiber speeds. Just know that bringing your own gear means you handle network troubleshooting yourself, though Mercury Fiber still supplies all the foundational equipment you need to get connected. A fiber plan often exceeds 1 Gbps, so a standard gigabit WAN port becomes a choke point. 5 Gbps to fully utilize. My Fiber is 200/50M, I use RB-450G why test speed not over 100M, can you help me?

Have you configured Fasttrack?

Have you configured Fasttrack?

Unfortunately the RB450G doesn't appear to support FastTrack <https://wiki.> Dual-band routers can broadcast signals on two frequencies: 2.4 GHz, which provides wider coverage but slower speeds, and 5 GHz, which offers faster speeds but shorter range.
