

Is fiber optic cable more expensive or broadband more expensive

Overview

Fiber is faster, highly reliable, more durable, and great for cloud-based or real-time work. This guide compares fiber-optic cable and traditional copper internet cable (coaxial cable) across key factors: technology, speed, reliability, and cost in 2025. Selecting the right one often feels confusing, but a proper choice drastically improves your daily online experience. Cable utilizes familiar copper wiring originally built. Material Costs: Copper cables are cheaper than fiber optic cables, making them a seemingly attractive choice for businesses with limited budgets. We'll compare the two in detail so you can decide which connection is the best for you. If you choose the same fiber speed as another provider's cable option, you are getting more bang for your buck due to. The difference between fiber vs cable Internet is a little more subtle. Plus, cable Internet is more widely available at the moment. Right now, only 50 percent of households have access.
