

Malaysia Industrial Switch 10G

Overview

These 10G industrial switches deliver ultra-fast connectivity with support for 10Gbps data rates, ensuring seamless communication for bandwidth-intensive applications. Designed with rugged construction, they withstand extreme temperatures, shock, and vibration, making them ideal. Equipped with dual power input ports and a wide 12-57V DC voltage range, ensuring continuous operation even if one power supply fails. Connected to an external alarm, the switch outputs an alarm signal promptly if a port is disconnected or power input is abnormal. The combination of high bandwidth connections, an Industry Standard CLI, and PoE options make the DGS-1510 Series ideal for Small-Medium Enterprise environments. For the core of your network, the DIS-700G-28XS features user management interfaces and provides diagnostics, security and controls to shape your managed network needs. Kaira is a regional distributor of IT peripherals, storage, networking, display products and services. We provide effective marketing for brands, as well as efficient support services for our customers.
