

Mauritania Gyfts Fiber Optic Cable

Overview

Mauritania launched the coastal installation of its second submarine cable, with full deployment scheduled for August 2026 and service expected in January 2027. The cable will deliver an initial capacity of 200 Gbps, scalable to 12 Tbps, linking the country to Europe and South. The West Africa Regional Communications Infrastructure Program (WARCIP) Project helped to increase the geographical reach of broadband networks and reduce the costs of communications services in Mauritania. The deployment of approximately 1,700 kilometers (km) of fiber optic cable enabled. Mauritania exports of Insulated wire, cable and other electric conductors, connector fitted or not; optical fibre cables of individually sheathed fibres, whether or not assembled with electric conductors or fitted with connectors was \$1,012. Mauritania exported Insulated. Imports In 2022, Mauritania imported \$37. A metallic or FRP wire, sometimes sheathed with polyethylene (PE) for cable with high fiber count, locates in the center of core as a strength member. IXP and Peering facility data is provided by PeeringDB.
