

# New Data Center Room Construction

## Overview

Data center construction builds secure facilities for servers, power, and cooling systems. Markets like Northern Virginia, Phoenix, and Dallas-Fort Worth have emerged as major hubs, while international locations in Dublin, Singapore, and Sydney continue to attract significant investment. Get costs, timelines, key steps, and tips to manage your project. Track equipment procurement. Data center standards encompass data privacy, as exemplified by the Federal Information Security Management Act (FISMA) in the United States and the General Data Protection Regulation (GDPR) in the European Union. Always check local laws, regulations and permit requirements and plan data center. Hyperscale facilities power cloud platforms and AI systems for companies like AWS, Microsoft, and Google. These projects often span multiple buildings and require 20 to 100+ megawatts of capacity. They're. According to a recent report by industryARC, the global data center construction market is projected to reach \$418 billion by 2030, following a projected 10% growth year-on-year, reflecting the critical role these facilities play in today's economy.
