

New Type of Concave Busbar Switchgear

Overview

NeoGear is a revolutionary new switchgear, based on an innovative busbar concept. Combined with the connectivity and digital smartness of the ABB Ability™ platform, it offers maximum safety, highest reliability, more flexibility, better efficiency and measurable ROI. ABB offers a total ev charging solution from compact, high quality AC wall boxes, reliable DC fast charging stations with robust connectivity, to innovative on-demand electric bus charging systems, we deploy infrastructure that meet the needs of the next generation of smarter mobility. ABB's Low. Busbars are the backbone of a low-voltage switchboard: rigid conductors that collect and distribute current safely between incoming devices and outgoing feeders. A busbar is a metal bar, usually made of copper or aluminum, that carries electricity inside switchgear. This guide explains how busbars work, common types, key design factors, and how to choose the right busbar for your application.
