

New type of power optical cable in Conghua

Overview

An optical fiber composite overhead ground wire (OPGW) is a new type of ground cable used in the high-voltage power transmission system that serves as both a conventional overhead ground cable and a communication optical cable. ZTT OPGW is mainly divided into: central-type stainless steel tube OPGW, stranded-type stainless steel tube OPGW, al-covered stainless steel tube OPGW, aluminum tube OPGW, lightning resistant central stainless steel tube OPGW with compressed wires and OPPC. In fact, it has an electrical power system that serves two purposes: a protective mechanism against lightning strikes and other electrical faults, resulting in ground conductivity for interacting with the other.
