

PoE Switch Quality

Overview

The NETGEAR GS305P stands out as the best overall due to its reliable unmanaged design and solid PoE+ capacity. For those seeking managed features, the TP-Link TL-SG1428PE offers extensive control and high PoE wattage, making it ideal for larger setups. After testing 12 switches for 45 days with various real-world scenarios including 16 IP. Setting up a network with IP cameras, wireless access points, or VoIP phones means running both data cables and power to every single device. That gets expensive and messy fast. Each device needs both data connectivity and power, creating a web of cables and power adapters that clutter your workspace and increase installation costs. However, many buyers face tradeoffs between. Not all switches labeled “PoE” can actually handle the power demands of modern devices, and the difference between a \$40 switch and an \$80 switch often means the difference between a stable network and devices randomly dropping offline at 2 AM.
