

Pole for hanging fiber optic cables

Overview

The Fiber Hook Pole Bracket, also known as a pole-mounted cable bracket or fiber optic cable hook, is a critical component for securing fiber optic cables. It is designed to provide a stable anchor point for cables, ensuring they remain organized and protected. Durable aerial hardware for fiber utility and telecom builds, including brackets, straps, J-hooks, clamps, grounding, and mounting solutions for pole line and aerial cable support. Used under the heads of bolts, nuts, and other threaded products to provide a broader bearing surface and increase the. Deploying fiber above ground on poles or towers removes the need for underground digging and is particularly useful when the ground is uneven, rocky or both. There are two kind of materials of slack storage in our product. The ADSS Suspension Guy Grip is a preformed helical product designed for suspending ADSS (All-Dielectric Self-Supporting) cables on intermediate poles.
