

Price of cable tray installation on retaining wall

Article Overview

Cable tray installation on a retaining wall typically ranges from \$20 to \$60 per meter, depending on material, tray type, and installation complexity.

Material Costs

The cost of the cable tray itself varies by material and type:

- Steel trays: \$5–\$25 per meter, widely used for strength and cost-effectiveness .
- Aluminum trays: More expensive than steel but lighter, reducing labor effort .
- Fiberglass trays: Durable and corrosion-resistant, often used in outdoor or harsh environments .
- Stainless steel trays: Highest cost, ideal for corrosive or outdoor conditions . Tray types also affect cost: ladder trays are common for heavy cable loads, while perforated or solid-bottom trays may be chosen for specific protection or maintenance needs .

Labor and Installation Costs

Installing cable trays on a retaining wall is more complex than standard horizontal installations, which increases labor costs. Key factors include:

- Height and accessibility: Elevated or vertical installations require scaffolding, lifts, or additional safety measures .
