

Price of motherboards for sale in telecommunications equipment rooms

Article Overview

Telecom motherboards can range from \$50 for scrap units to several hundred dollars for refurbished or specialized network hardware.

New and Refurbished Motherboards

For operational telecom equipment rooms, refurbished or used motherboards from major manufacturers like Cisco, Alcatel-Lucent, Ericsson, and Nortel are commonly available. Providers such as Telecoms Traders and CES Telecom offer these motherboards at up to 90% off the original supplier price, depending on the model, age, and condition . Prices vary widely:

- Standard network switch or server motherboards: \$150–\$500 per unit, depending on manufacturer and compatibility.
- High-end telecom server boards (e.g., Ericsson AXE 10 or Marconi systems): \$400–\$800 per unit, often including warranty and immediate shipment .
- Bulk purchases or long-term client agreements may reduce costs further.

Scrap Motherboards

If the motherboards are no longer functional or being recycled, scrap pricing applies. Scrap yards and e-waste buyers pay based on weight and recoverable materials such as gold, copper, and other metals:

- Typical scrap value for telecom motherboards ranges from \$2 to \$10 per pound, depending on metal content and market rates .
