

Revit reducing cable tray elbow

Overview

You can create a fitting to join two connectors (at end of cable tray) by calling the Revit. These methods take the connectors as input. In need to create an elbow that starts at a right angle and that has the ability adopt the angle of the routing of the cable tray. I have attached a few pictures with examples. Cable trays help keep complex technology systems safe and secure without detracting from the appearance of the surrounding environment. From industrial cable management systems to office environments, houses of worship, and even performance. Hi, Follow @iainsavage instruction can help you solve this In this case, you should re-create the family I've attached a image for more information 11-08-2024 11:28 PM Thank you so much for your Tip it actually works with me, but I have a problem with angle trays, it always breaks, I adjusted the.
