

Track Cable Terminal Box

Overview

Moulded nesting grooves simplify cable entry to suit individual applications. A full-width clamp/brush sealing arrangement secures the cables, requiring only a single Allen key. This design facilitates rapid assembly and allows you to quickly and easily check cable routings. You can use the boxes with cables that need on-site termination or with ce. Prysmian BICON Flexo Trackside Disconnect Boxes used throughout the railway network to connect signalling equipment to location cabinets.

1. Unique design incorporates a hard neoprene moulded back plate, with sliding steel cover - providing excellent accessibility. 2. With the cover removed, access to the internal terminals is available on all side. The Flexo range of trackside disconnection boxes is compatible with a variety of applications, including Clamplock, Track Circuit, AWS TCAID and Level Crossing Treadle. The unique design incorporates a hard neoprene moulded back plate, with sliding steel cover providing excellent accessibility. The rail bonding (stud Connections) are catered for wi. The design principles applied ensure that every unit exceeds the performance requirements. Specifically, the threaded inserts are fully bonded to the neoprene to ensure integrity. Manufactured from high grade brass to guarantee long life. The covers are exceptionally tough and corrosion resistant. The neoprene body ensures the elimination of vibrat. The FLEXO product portfolio is wide ranging and varied, each design having its origins in the need to meet a particular customer requirement. Many are now “standard” solutions to certain connection applications and include: 1. Track Circuit Cable Assemblies 2. Trackside Disconnect Boxes 3. Detection System Cable Assemblies 4. Points Heating System.
