

What s a good price for cable tray end capping

Article Overview

Cable tray end caps typically range from \$0.50 to \$5 per piece depending on material, type, and pack size.

Overview of Cable Tray End Caps

Cable tray end caps are essential for sealing the open ends of cable trays, protecting cables from environmental exposure, preventing accidental contact, and providing a clean, professional finish . They are available in various materials:

- Rubber: Flexible, protects installers from cuts, often sold in bulk packs (e.g., 50 pieces per pack) for around \$25-\$50 per pack .
- PVC: Lightweight, non-conductive, suitable for indoor installations, prices vary depending on supplier and quantity.
- Stainless Steel (304/316): Corrosion-resistant, ideal for industrial or outdoor environments, generally more expensive, often \$3-\$5 per piece.
- Fiberglass-Reinforced Polymer (FRP): Lightweight, durable, and corrosion-resistant, typically used in harsh environments, prices similar to stainless steel .

Pricing Considerations

- Pack Size: Bulk packs reduce per-unit cost. For example, a 50-pack of rubber end caps may cost \$25-\$50, making each cap \$0.50-\$1 .
- Material and Durability: Stainless steel and FRP end caps are more expensive due to higher durability and resistance to corrosion.
